| • Psychology | • Politics (Applied political sciences) |

University of Manchester (2021-2022)

- Web development

WORK EXPERIENCE

ASDA LTD. (2015-2019)

I began working at ASDA LTD from the age of 16, in this time I worked in multiple departments. The bulk summary of my work in these departments would be; replenishment, stock management, Security and sales. In each of these departments I became highly trained and often found myself applying problem solving skills to everyday dilemmas with the team which I worked alongside. I would often find myself organizing my colleagues' rolls for effective time management to complete tasks that had been relayed by upper management; this would be accompanied by frequently engaging in dialogue with head office, discussing solutions for our collective problems at this local branch.

Self Owned retail arbitrage business (2018)

During a period of last year to early 2018 I launched a website selling christian items to the American public using a combination of high value marking up of products and targeted marketing using social media combined with custom written webhook scripts to place orders on my behalf. The business was fairly successful however required too much time to maintain as social media marketing and research became a large drain on my time meaning I could not go further with this project but feel I would once again like to pursue this kind of subject as the fields of marketing and sales were quite fascinating.

Freelance Graphic design/VFX Work (2017-2021)

I have designed logos for Competitive gaming organizations and done some video editing/VFX & GFX design work with youtubers, Designed graphics for professional streamers on the Twitch.com and Mixer.com platforms. These projects were completed using the following programs:

-Adobe Photoshop CC -Adobe After Effects CC -Adobe Illustrator CC -Sony Vegas Pro 12/13

Camp Merry Heart (2019)

I joined camp Merry Heart in the summer of 2019 working with adults and children with disabilities ranging from high functioning autism to quadriplegics with G-tubes, colostomy bags and other varying degrees of conditions providing 24 hour care. This work I have found; while extremely tiresome as we often work 80+ hour weeks, has been extremely rewarding to help such a group of people. My work at camp has been anything between providing personal care, maintaining our clients personal health to managing their medications and overseeing this for others. At times I have assisted in the distribution of medication to 16 or so clients. I have also organized, planned and ran activities for our clients throughout the day; this can be anywhere between 40-80 clients during these activities. At the camp, we have also had the pleasure of working with the MDA group and kids who have at some point been in the american foster care system on site.

Verastar LTD (2020-2021)

Business to business Telecoms and Communication Sales Associate. I worked for a year for Verstar representing them under many of their sub brands. Specifically in their networking and telecoms department. This role would have me contacting existing clients and evaluating their needs as a company in terms of this sector. Then working on implementation and negotiating of contracts to ensure smooth set up and or transitional periods of their services to then improve the business.

Guitar teacher (2021)

As of 2021 I became a self employed guitar teacher working with mostly kids between the ages of 5-15. This would include arranging lesson plans, evaluating current ability and creating progression plans for students.

Full stack web development - University of manchester (2021)

I began my journey into coding as a student in a coding bootcamp at university of Manchester, focusing on full stack development. This includes learning such skills as:

- HTML
- CSS
- JavaScript & JQuery
- React Native
- Express.JS
- Node.JS

Notable pieces of work experience

- Red cross first aid trained
- Softwares familiar in a professional capacity : Microsoft Office/Excel/Outlook/Teams, Zoom, Skype, Visual Studio Code, CRMs (Front end).
